

Gorilla Ammunition

223 Remington 62gr Punisher Series – Fracturing

The loading data provided is only for use in modern firearms. Starting loads should be safe in correctly manufactured, tested, and maintained modern firearms of the associated caliber. Reloading ammunition should only be done by individuals familiar with proper procedures and adherence to safe practices in handling explosives. Gorilla Ammunition does not make any warranty of merchantability or fitness on data given for a particular use. Anyone attempting to reload ammunition should do so in a safe manner. One should always begin load development with suggested starting loads. Never exceed published recommended maximum charge weights or pressures. Changing loading length can and will create dangerous pressures resulting in catastrophic failure. One should observe for any signs of high pressures, such as, but not limited to, case expansion, pierced or flattened primers, difficulty extracting a cartridge, or changes in recoil. If you observe any signs of high pressures, immediately cease firing the weapon.

Caliber: .223 Remington	Projectile Weight: 62 Grains	Projectile SKU: GAP22362
