

# M134 SUPPRESSOR

- Eliminates almost all flash when firing.
- Capable of firing subsonic or supersonic ammunition.
- Only requires removal of front nut to service and clean the internal baffles.

Dramatically reduces blast overpressure to mitigate operator risks and longterm effects.

## M134 MINI-GUN KEY FEATURES +UPGRADES

- 3-piece rotor design with replaceable parts for longer lifespan of serialized part.
- Quick-attach bolt tracks for tool-less bolt removal and installation.
- Integral LiFePO4 battery capable of 50,000 rounds of power.
- Lightweight housing with quick-detach guide bar and built-in vertical arm adapter to reduce weight.
- Multi-caliber delinker with dual paddle wheels that utilize a quick-locking head, requiring no tools for maintenance.

### DELINKER

- All components on assembly replaceable for longer life span and serviceability.
- Multi-caliber capable with simple parts swap in minutes.
- Dual paddle wheel design with round support for smooth feeding.
- Circular push rods for smooth and easy push of the cartridge during the delinking process.

### SPADE GRIP ADAPTER

- Attaches to the weapon platform in fixed forward applications allowing better security and tighter dispersion while firing.
- May also be used with a Gun Control Unit in crew served applications.

### GUIDE BAR + HOUSING

- 4.5LB Yolkless housing with mounting arm adapter installed.
- Quick attach guide bar for fast, tool-less malfunction clearing.
- Guide bar design allows seamless functionality with lightweight polymer ammunition.

### ROTOR

- 3-piece rotor design allows users to replace any component of the entire rotor assembly.
- Replaceable camming section allowing for an extended lifespan.
- Quick attach bolt tracks for immediate tool-less bolt removal or installation.
- Ability to accept GE, Dillon Ti or DTV quick attach guide bars.
- Available in titanium or stainless steel.

### BATTERY + FEED SYSTEM

- Upgraded 3,000 round ammo can rollers for smoother ammunition feeding.
- Battery is MIL-STD-810H and UNDOT 38.3 certified.
- The assembly has a built in charger, battery health gauge and the battery is easily removable.
- Quick attach Booster Assembly with integrated round repositioned and brushless motor.

### SAFING SECTOR

- Safing gate arms and disarms the weapon system.
- Top cover allows visual inspection inside the weapon system and acts as a dual safety mechanism.
